THE DEFENDANT

12. The defendant identified herein as DOE- 24.22.51.32 is currently known only by their Internet Protocol (“IP”) Address 24.22.51.32 which on 06/22/2015 at 08:59:20 AM UTC, was observed through direct TCP/IP connection as infringing the motion picture.

13. Through geolocation, the IP address used by the defendant has subsequently been traced to the State of Oregon.

14. The defendant’s IP address has been observed and confirmed as distributing plaintiff’s motion picture multiple times.

15. The defendant’s IP address has been observed as associated with the peer-to-peer exchange of a large number of copyrighted titles through the BitTorrent network.

16. The volume and titles of the activity associated with the defendant’s IP address indicates that the defendant is likely the primary subscriber of the IP address or someone who resides with the subscriber, as such activity indicates the defendant is an authorized user of the IP address with consistent and permissive access.

17. The volume of the activity associated with the defendant’s IP address indicates that anyone actively using or observing activity on the IP address would likely be aware of the conduct of the defendant.

18. The volume and titles of the activity associated with the defendant’s IP address indicates that the defendant is not a young child.

19. The defendant’s IP address was at that time of observed infringement managed by Internet Service Provider (“ISP”) Comcast, who on information and belief, generally assigns an IP address to a single party for extended periods of time, often for months and provides Wi-Fi systems with notable pre-installed security and passwords.

20. The records maintained by Comcast should be able to identify either the defendant, or the subscriber who contracted with Comcast for service who in turn is likely to have knowledge that will lead to the identity of the defendant.

21. Plaintiff intends to seek initial discovery to subpoena records from Comcast to ascertain the true identity of the defendant.

BACKGROUND

PEER-TO-PEER INTERNET PIRACY

22. Digital piracy, including BitTorrent piracy, costs the entertainment industry over \$70 billion per year.

23. As noted by Senator Levin in Congressional hearings on peer-to-peer Internet piracy, “In the world of copyright law, taking someone’s intellectual property is a serious offense, punishable by large fines. In the real world, violations of copyright law over the Internet are so widespread and easy to accomplish that many participants seem to consider it equivalent to jaywalking – illegal but no big deal. But it is a big deal. Under U.S. law, stealing intellectual property is just that – stealing. It hurts artists, the music industry, the movie industry, and others involved in creative work. And it is unfortunate that the software being used – called ‘file sharing’ as if it were simply enabling friends to share recipes, is helping create a generation of Americans who don’t see the harm.”

24. In 2013, in recognition of the growing problems and challenges with counterfeiting and piracy, The Oregon House of Representatives passed House Memorial 2, which made the following findings:

Whereas the United States and other nations share the challenge of combating intellectual piracy and the counterfeiting of intellectual property such as ... films... and technologies that affect the quality of life; and

Whereas intellectual piracy and counterfeiting have a significant impact on Oregon's economy, and the economies of other states and of nations around the world, which

results in job and earnings losses, reduced tax revenues and increased threats to public health and safety; and

...

Whereas protecting and enforcing intellectual property rights is crucial to the future of our innovation-based economy; and

Whereas industries that use intellectual property extensively generate nearly \$7.7 trillion in gross output and account for more than 60 percent of total exports from our nation; and

Whereas industries that use intellectual property extensively ... employ more than 19 million Americans, whose salaries average about 60 percent higher than salaries in industries that do not make extensive use of intellectual property; and

Whereas intellectual property infringement can undermine the nation's economic security; and

Whereas violations of intellectual property rights, ambiguities in the law and a lack of enforcement create uncertainty in the marketplace and in the legal system and undermine consumer trust; and

Whereas intellectual property, including trademarks, [are] essential ...; and

...

Whereas failing to adequately protect and enforce intellectual property rights will increase counterfeiting and illicit trade;

...

25. As such it is clear that giving effect to 17 U.S.C. §§ 101 et seq., and the enforcement of intellectual property rights, and in particular the fight against counterfeiting and piracy are critical issues of importance to the both the United States of America and the State of Oregon.

26. Internet piracy, and in particular BitTorrent piracy, though known as peer-to-peer file sharing, is often a for-profit business as many software clients, torrent sites and networks generate millions of dollars in revenue through sales and advertising.

27. To increase the value of the advertising and sometimes subscription access sold by torrent sites, many parties work to expand the pool of available titles and speed of downloads available by increasing the number of member peers and thus the desirability of their clients and networks. To accomplish this they often reward participants who contribute by giving them faster download speeds, greater access, or other benefits.

28. Defendant's participation in the BitTorrent exchange of plaintiff's motion picture is the type of activity that torrent sites use to promote their business and likely directly furthered the for-profit business of at least one torrent site.

29. Many parties, and possibly defendant have been compensated for their participation in expanding the availability of pirated content to others through BitTorrent networks, including plaintiff's movie.

30. The use of BitTorrent does more than cause harm through the simple theft of intellectual property. The BitTorrent distribution of pirated files is a model of business that profits from theft through sales and advertising and provides a system of rewards and compensation to the participants, each of whom contribute to and further the enterprise.

31. Based on activity observed associated with defendant's IP address, defendant is a prolific proponent of the BitTorrent distribution system advancing the BitTorrent economy of piracy.
